## PROFILE

Results-driven **Software Development Engineer** with strong foundations in backend development, RESTful API design, and scalable cloud-based systems. Experienced in building secure, production-ready web applications using **Python, Flask, and cloud services**. Adept at leveraging **data analytics and SQL** to build reliable, high-performance software solutions.

## EDUCATION

**BMS College of Engineering** Dec 2023 – Jul 2026 (Expected)  
Bachelor of Engineering in Information Science and Engineering **CGPA: 7.7/10.0**

**MEI Polytechnic College** Jun 2020 – May 2023  
Diploma in Computer Science and Engineering **CGPA: 9.4/10.0**

## TECHNICAL SKILLS

**Programming:** Python, Java, C++, JavaScript, HTML, CSS

**Backend & Systems:** Flask, RESTful APIs, Authentication, Authorization, CORS

**Databases:** MySQL, SQLite, Database Design, Query Optimization

**Cloud & DevOps:** Google Cloud Storage, Firebase Auth, Render, Git, GitHub

**Data & Analytics:** SQL, Pandas, NumPy, ETL

**AI & ML (Exposure):** PyTorch, TensorFlow, OpenCV, FaceNet, MTCNN

## PROFESSIONAL PROJECTS

**CloudDrive – Secure Cloud File Storage Platform** Mar 2024 – May 2024

🐙 GitHub Repository

- Built a secure, multi-user cloud file storage system with role-based authentication and per-user file isolation.
- Designed and implemented RESTful APIs for file upload, download, listing, and deletion using Flask.
- Integrated Google Cloud Storage to ensure scalable, durable backend file management.
- Implemented Firebase Authentication with token-based authorization for secure session handling.
- Deployed the application on Render with environment-based configuration and secret management.
- *Tech: Python, Flask, Firebase Auth, Google Cloud Storage, REST API*

**Blinkit Sales & Operations Data Analysis** Feb 2025

🐙 GitHub Repository

- Processed and analyzed large-scale Blinkit sales and delivery datasets using Python.
- Built data cleaning, normalization, and aggregation pipelines to ensure consistent analytics.
- Analyzed product categories, outlet performance, and demand trends to derive operational insights.
- Designed reusable Python functions for metric computation and reporting.
- *Tech: Python, Pandas, NumPy, SQL, Jupyter Notebook*

**AI-Powered Child Face Progression and Recognition System** Jul 2025 – Dec 2025

🐙 GitHub Repository

- Developed a deep-learning-based system for child face recognition and age progression.
- Built modular pipelines for face detection, embedding extraction, and identity verification.
- Evaluated system accuracy using similarity metrics to ensure identity preservation.
- *Tech: Python, PyTorch, FaceNet, MTCNN, OpenCV*

## PUBLICATIONS & RESEARCH

**Introduction to Drones: Applications in Modern Technology Systems** Sep 2025

Journal of Information and Computational Science (JOICS)

- Co-authored peer-reviewed research on scalable drone-based systems and automation technologies.

## PROFESSIONAL CERTIFICATIONS

**Python Programming – Reliance Foundation** Oct 2024

**Deloitte Data Analytics Virtual Experience – Forage** Jul 2025

**SQL Advanced Certificate – HackerRank** Sep 2025

**Google Cloud Career Launchpad – Cybersecurity Track** Nov 2025
